2. Which scaled Agile framework coordinates multiple Scrum Teams and integrates their work to create one larger, cohesive deliverable?

`1 / 1 point`

○ Disciplined Agile Delivery (DAD)

⦿ Scrum of Scrums

○ Scaled Agile Framework (SAFe)

○ Large-Scale Scrum (LeSS)

✔ **Correct**
Scrum of Scrums breaks teams of 12 or more people into smaller Scrum Teams and focuses on coordination among them. There is a Scrum Master for each team and a Scrum of Scrums Master who focuses on the Scrum process across teams.

3. What is the benefit of business agility?

`1 / 1 point`

○ It helps teams rapidly evolve large-scale software systems.

⦿ It helps organizations thrive in high-VUCA environments.

○ It combines software development with IT operations.

○ It serves as a strict instruction manual for scaling Agile, rather than a general framework.

✔ **Correct**
Business agility incorporates Agile principles into management. This helps organizations facing VUCA conditions such as volatility, uncertainty, complexity, and ambiguity.

4. Imagine you are a project manager at a video game company. Your last large-scale software release contained so many technical issues that they upset your customers and overwhelmed your Developers.
